

COMBINED PEDESTRIAN GUARDRAILS

A reliable solution for ensuring safety of pedestrian zones, in particular in those places where the requirements of GOST 52289 do not provide for the installation of traffic guardrails.

It is installed at pedestrian crossings, in public recreation areas and other crowded places. The design may not only direct the traffic of pedestrians, but also protect them from being hit by a passenger car.

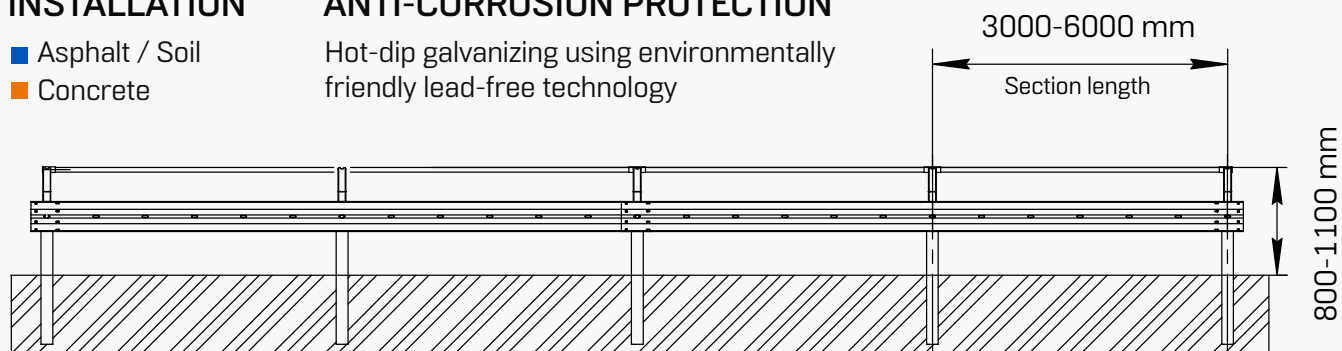

INSTALLATION

- Asphalt / Soil
- Concrete

ANTI-CORROSION PROTECTION

Hot-dip galvanizing using environmentally friendly lead-free technology
